How do we know that molecules really exist? An important clue came from Brownian movement, a concept developed in 1827 by botanist Robert Brown, who noticed that tiny objects like pollen grains shook and moved erratically when viewed under a microscope. Nearly 80 years later, in 1905, Albert Einstein explained this "Brownian motion" as the result of bombardment by molecules. Einstein offered a quantitative explanation by mathematically estimating the average distance covered by the particles over time as a result of molecular bombardment. Four years later, Jean Baptiste Perrin wrote Brownian Movement and Molecular Reality, a work that explains his painstaking measurements of the displacements of particles of a resin suspended in water — experiments that yielded average displacements in excellent accord with Einstein's theoretical prediction.

The studies of Einstein and Perrin provided some of the first concrete evidence for the existence of molecules. Perrin, whose name is familiar to all who employ his methods for calculations in molecular dynamics, received the 1926 Nobel Prize in physics. In this classic paper, he introduced the concept of Avogadro's number, along with other groundbreaking work. Originally published in the French journal Annates de chimie et de physique, it was translated into English by Frederick Soddy to enduring influence and acclaim.

#### From reader reviews:

#### Sun Byrd:

Typically the book Brownian Movement and Molecular Reality (Dover Books on Physics) will bring you to the new experience of reading a new book. The author style to clarify the idea is very unique. Should you try to find new book to study, this book very ideal to you. The book Brownian Movement and Molecular Reality (Dover Books on Physics) is much recommended to you to see. You can also get the e-book in the official web site, so you can quicker to read the book.

#### **Blanche Watson:**

Reading can called imagination hangout, why? Because while you are reading a book specifically book entitled Brownian Movement and Molecular Reality (Dover Books on Physics) your brain will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely can be your mind friends. Imaging each word written in a guide then become one application form conclusion and explanation that maybe you never get previous to. The Brownian Movement and Molecular Reality (Dover Books on Physics) giving you an additional experience more than blown away the mind but also giving you useful details for your better life with this era. So now let us present to you the relaxing pattern is your body and mind is going to be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary investing spare time activity?

Do you like reading a guide? Confuse to looking for your selected book? Or your book was rare? Why so many query for the book? But any people feel that they enjoy to get reading. Some people likes examining, not only science book but also novel and Brownian Movement and Molecular Reality (Dover Books on Physics) or even others sources were given understanding for you. After you know how the great a book, you feel desire to read more and more. Science book was created for teacher or perhaps students especially. Those books are helping them to increase their knowledge. In some other case, beside science reserve, any other book likes Brownian Movement and Molecular Reality (Dover Books on Physics) to make your spare time considerably more colorful. Many types of book like here.

#### **Ann Macdonald:**

A lot of book has printed but it takes a different approach. You can get it by internet on social media. You can choose the very best book for you, science, witty, novel, or whatever by means of searching from it. It is named of book Brownian Movement and Molecular Reality (Dover Books on Physics). You can add your knowledge by it. Without making the printed book, it may add your knowledge and make a person happier to read. It is most essential that, you must aware about guide. It can bring you from one location to other place.
