Connectionist Models of Development: Developmental Processes in Real and Artificial Neural Networks (Studies in Developmental Psychology)

Connectionist Models of Development is an edited collection of essays on the current work concerning connectionist or neural network models of human development. The brain comprises millions of nerve cells that share myriad connections, and this book looks at how human development in these systems is typically characterised as adaptive changes to the strengths of these connections. The traditional accounts of connectionist learning, based on adaptive changes to weighted connections, are explored alongside the dynamic accounts in which networks generate their own structures as learning proceeds.

Unlike most connectionist accounts of psychological processes which deal with the fully-mature system, this text brings to the fore a discussion of developmental processes. To investigate human cognitive and perceptual development, connectionist models of learning and representation are adopted alongside various aspects of language and knowledge acquisition. There are sections on artificial intelligence and how computer programs have been designed to mimic the development processes, as well as chapters which describe what is currently known about how real brains develop.

This book is a much-needed addition to the existing literature on connectionist development as it includes up-to-date examples of research on current controversies in the field as well as new features such as genetic connectionism and biological theories of the brain. It will be invaluable to academic researchers, post-graduates and undergraduates in developmental psychology and those researching connectionist/neural networks as well as those in related fields such as psycholinguistics.

From reader reviews:

Joan Jackson:

Hey guys, do you really wants to finds a new book to see? May be the book with the concept Connectionist Models of Development: Developmental Processes in Real and Artificial Neural Networks (Studies in Developmental Psychology) suitable to you? The particular book was written by well-known writer in this era. The book untitled Connectionist Models of Development: Developmental Processes in Real and Artificial Neural Networks (Studies in Developmental Psychology)is one of several books in which everyone read now. This kind of book was inspired many men and women in the world. When you read this book you will enter the new dimensions that you ever know ahead of. The author explained their concept in the simple way, consequently all of people can easily to recognise the core of this guide. This book will give you a wide range of information about this world now. So you can see the represented of the world on this book.

Alberta Keyes:

Many people spending their time period by playing outside along with friends, fun activity along with family or just watching TV all day every day. You can have new activity to shell out your whole day by looking at a book. Ugh, ya think reading a book really can hard because you have to take the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Smart phone. Like Connectionist Models of Development: Developmental Processes in Real and Artificial Neural Networks (Studies in Developmental Psychology) which is getting the e-book version. So , try out this book? Let's find.

Kevin Caputo:

As a university student exactly feel bored to be able to reading. If their teacher requested them to go to the library as well as to make summary for some book, they are complained. Just small students that has reading's heart or real their hobby. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that looking at is not important, boring as well as can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Connectionist Models of Development: Developmental Processes in Real and Artificial Neural Networks (Studies in Developmental Psychology) can make you experience more interested to read.

Joan Stump:

What is your hobby? Have you heard that question when you got students? We believe that that issue was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person including reading or as studying become their hobby. You need to understand that reading is very important along with book as to be the thing. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You find good news or update about something by

book. Different categories of books that can you decide to try be your object. One of them are these claims Connectionist Models of Development: Developmental Processes in Real and Artificial Neural Networks (Studies in Developmental Psychology).
