## Microsoft® Reference Architecture for Commerce Version 2.0 Microsoft Corporation

The Microsoft Reference Architecture for Commerce, Version 2.0 consists of code and documentation designed to accelerate the development of e-commerce solutions for medium to large businesses. This volume includes an e-commerce application, which contains reusable and customizable components and was designed to address many of the general business requirements that are common to e-commerce solutions.

It also provides complete documentation, including a thorough explanation of the application components and the decisions behind the code design and development process. Also: instructions for using, modifying, and testing the code, and procedures for setting up the development environment and installing the application.
