Data Analysis Using Regression and Multilevel/Hierarchical Models

Andrew Gelman, Jennifer Hill

Data Analysis Using Regression and Multilevel/Hierarchical Models Andrew Gelman, Jennifer Hill

Data Analysis Using Regression and Multilevel/Hierarchical Models is a comprehensive manual for the applied researcher who wants to perform data analysis using linear and nonlinear regression and multilevel models. The book introduces a wide variety of models, whilst at the same time instructing the reader in how to fit these models using available software packages. The book illustrates the concepts by working through scores of real data examples that have arisen from the authors' own applied research, with programming codes provided for each one. Topics covered include causal inference, including regression, poststratification, matching, regression discontinuity, and instrumental variables, as well as multilevel logistic regression and missing-data imputation. Practical tips regarding building, fitting, and understanding are provided throughout. Author resource page: <http://www.stat.columbia.edu/~gelman/arm/>

From reader reviews:

Helen Arnold:

Book is to be different for every single grade. Book for children right up until adult are different content. As we know that book is very important usually. The book Data Analysis Using Regression and Multilevel/Hierarchical Models was making you to know about other information and of course you can take more information. It is quite advantages for you. The reserve Data Analysis Using Regression and Multilevel/Hierarchical Models is not only giving you far more new information but also to get your friend when you sense bored. You can spend your current spend time to read your book. Try to make relationship with the book Data Analysis Using Regression and Multilevel/Hierarchical Models. You never really feel lose out for everything in case you read some books.

Patricia Welling:

Your reading 6th sense will not betray you, why because this Data Analysis Using Regression and Multilevel/Hierarchical Models reserve written by well-known writer who really knows well how to make book that may be understand by anyone who have read the book. Written in good manner for you, still dripping wet every ideas and producing skill only for eliminate your current hunger then you still doubt Data Analysis Using Regression and Multilevel/Hierarchical Models as good book not merely by the cover but also by content. This is one publication that can break don't assess book by its include, so do you still needing another sixth sense to pick this particular!?! Oh come on your studying sixth sense already told you so why you have to listening to an additional sixth sense.

Geraldine Louis:

Beside this specific Data Analysis Using Regression and Multilevel/Hierarchical Models in your phone, it might give you a way to get more close to the new knowledge or details. The information and the knowledge you may got here is fresh in the oven so don't become worry if you feel like an aged people live in narrow commune. It is good thing to have Data Analysis Using Regression and Multilevel/Hierarchical Models because this book offers to your account readable information. Do you at times have book but you don't get what it's facts concerning. Oh come on, that will not end up to happen if you have this in the hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. So do you still want to miss it? Find this book along with read it from currently!

Effie Peoples:

Reading a guide make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is composed or printed or illustrated from each source which filled update of news. Within this modern era like today, many ways to get information are available for a person. From media social including newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just

looking for the Data Analysis Using Regression and Multilevel/Hierarchical Models when you essential it?
