Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics) Xavier Tolsa

This book studies some of the groundbreaking advances that have been made regarding analytic capacity and its relationship to rectifiability in the decade 1995–2005. The Cauchy transform plays a fundamental role in this area and is accordingly one of the main subjects covered. Another important topic, which may be of independent interest for many analysts, is the so-called non-homogeneous Calderón-Zygmund theory, the development of which has been largely motivated by the problems arising in connection with analytic capacity. The Painlevé problem, which was first posed around 1900, consists in finding a description of the removable singularities for bounded analytic functions in metric and geometric terms. Analytic capacity is a key tool in the study of this problem. In the 1960s Vitushkin conjectured that the removable sets which have finite length coincide with those which are purely unrectifiable. Moreover, because of the applications to the theory of uniform rational approximation, he posed the question as to whether analytic capacity is semiadditive. This work presents full proofs of Vitushkin's conjecture and of the semiadditivity of analytic capacity, both of which remained open problems until very recently. Other related questions are also discussed, such as the relationship between rectifiability and the existence of principal values for the Cauchy transforms and other singular integrals. The book is largely self-contained and should be accessible for graduate students in analysis, as well as a valuable resource for researchers.

From reader reviews:

Aaron Martinez:

Do you one of people who can't read satisfying if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics) book is readable by simply you who hate the straight word style. You will find the facts here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to offer to you. The writer of Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics) content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics) is not loveable to be your top record reading book?

Joseph Bateman:

Reading a guide tends to be new life style in this particular era globalization. With reading through you can get a lot of information that can give you benefit in your life. Using book everyone in this world can share their idea. Books can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or their experience. Not only the storyline that share in the guides. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on this planet always try to improve their talent in writing, they also doing some exploration before they write with their book. One of them is this Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics).

Kisha Hutton:

Do you really one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you find out the inside because don't ascertain book by its cover may doesn't work here is difficult job because you are afraid that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer might be Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics) why because the excellent cover that make you consider concerning the content will not disappoint an individual. The inside or content will be fantastic as the outside as well as cover. Your reading sixth sense will directly make suggestions to pick up this book.

Terry Burrows:

A number of people said that they feel fed up when they reading a publication. They are directly felt that when they get a half regions of the book. You can choose the book Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics) to make your own

reading is interesting. Your skill of reading proficiency is developing when you similar to reading. Try to choose easy book to make you enjoy to read it and mingle the sensation about book and studying especially. It is to be first opinion for you to like to available a book and read it. Beside that the guide Analytic Capacity, the Cauchy Transform, and Non-homogeneous Calderón-Zygmund Theory (Progress in Mathematics) can to be a newly purchased friend when you're feel alone and confuse with what must you're doing of that time.
