Applied Statistical Designs for the Researcher (Chapman & Hall/CRC Biostatistics Series)

Daryl S. Paulson

Applied Statistical Designs for the Researcher (Chapman & Hall/CRC Biostatistics Series) Daryl S. Paulson

Showcasing a discussion of the experimental process and a review of basic statistics, this volume provides methodologies to identify general data distribution, skewness, and outliers. It features a unique classification of the nonparametric analogs of their parametric counterparts according to the strength of the collected data. Applied Statistical Designs for the Researcher discusses three varieties of the Student t test, including a comparison of two different groups with different variances; two groups with the same variance; and a matched, paired group. It introduces the analysis of variance and Latin Square designs and presents screening approaches to comparing two factors and their interactions.
