Sandhya Samarasinghe

Neural Networks for Applied Sciences and Engineering: From Fundamentals to Complex Pattern Recognition Sandhya Samarasinghe

In response to the exponentially increasing need to analyze vast amounts of data, Neural Networks for Applied Sciences and Engineering: From Fundamentals to Complex Pattern Recognition provides scientists with a simple but systematic introduction to neural networks.

Beginning with an introductory discussion on the role of neural networks in scientific data analysis, this book provides a solid foundation of basic neural network concepts. It contains an overview of neural network architectures for practical data analysis followed by extensive step-by-step coverage on linear networks, as well as, multi-layer perceptron for nonlinear prediction and classification explaining all stages of processing and model development illustrated through practical examples and case studies. Later chapters present an extensive coverage on Self Organizing Maps for nonlinear data clustering, recurrent networks for linear nonlinear time series forecasting, and other network types suitable for scientific data analysis.

With an easy to understand format using extensive graphical illustrations and multidisciplinary scientific context, this book fills the gap in the market for neural networks for multi-dimensional scientific data, and relates neural networks to statistics.

Features

§ Explains neural networks in a multi-disciplinary context

§ Uses extensive graphical illustrations to explain complex mathematical concepts for quick and easy understanding

? Examines in-depth neural networks for linear and nonlinear prediction, classification, clustering and forecasting

§ Illustrates all stages of model development and interpretation of results, including data preprocessing, data dimensionality reduction, input selection, model development and validation, model uncertainty assessment, sensitivity analyses on inputs, errors and model parameters

Sandhya Samarasinghe obtained her MSc in Mechanical Engineering from Lumumba University in Russia and an MS and PhD in Engineering from Virginia Tech, USA. Her neural networks research focuses on theoretical understanding and advancements as well as practical implementations.

From reader reviews:

Esther Price:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to understand everything in the world. Each reserve has different aim or even goal; it means that guide has different type. Some people feel enjoy to spend their time and energy to read a book. They may be reading whatever they have because their hobby will be reading a book. How about the person who don't like reading through a book? Sometime, man feel need book whenever they found difficult problem as well as exercise. Well, probably you should have this Neural Networks for Applied Sciences and Engineering: From Fundamentals to Complex Pattern Recognition.

Marquita Oswald:

The actual book Neural Networks for Applied Sciences and Engineering: From Fundamentals to Complex Pattern Recognition will bring you to definitely the new experience of reading any book. The author style to clarify the idea is very unique. In the event you try to find new book you just read, this book very suitable to you. The book Neural Networks for Applied Sciences and Engineering: From Fundamentals to Complex Pattern Recognition is much recommended to you you just read. You can also get the e-book in the official web site, so you can easier to read the book.

Cliff Boyd:

People live in this new morning of lifestyle always try to and must have the free time or they will get wide range of stress from both day to day life and work. So , when we ask do people have free time, we will say absolutely yes. People is human not really a robot. Then we request again, what kind of activity do you possess when the spare time coming to a person of course your answer can unlimited right. Then ever try this one, reading ebooks. It can be your alternative with spending your spare time, the particular book you have read is Neural Networks for Applied Sciences and Engineering: From Fundamentals to Complex Pattern Recognition.

James Edgar:

In this particular era which is the greater man or woman or who has ability in doing something more are more treasured than other. Do you want to become one of it? It is just simple approach to have that. What you are related is just spending your time little but quite enough to possess a look at some books. One of many books in the top listing in your reading list is definitely Neural Networks for Applied Sciences and Engineering: From Fundamentals to Complex Pattern Recognition. This book and that is qualified as The Hungry Slopes can get you closer in turning into precious person. By looking upwards and review this book you can get many advantages.
