## **Where on Earth Are We Going?** Maurice Strong

World hunger, environmental disaster, global warming, massive shifts in weather systems, the re-emergence of diseases long thought controlled, and political turmoil in a world where a barrel of water is more expensive than a barrel of oil. So says the Report to Shareholders, Earth, Inc., dated January 1, 2031 that begins, Where on earth are we going? Maurice Strong's apocalyptic prophesy for the future - unless we're lucky or wise - is a call to action for all who care about the state of the earth in the near future. Strong, the executive coordinator of the reform effort at the UN and senior advisor to the President of the World Bank, has one goal: to shape a peaceful and equitable future for all humankind. Hard-headed, practical, impassioned, Where on Earth are We Going? is a call to action by a key business and environmental player at the beginning of the 21st century that can not be ignored and will be much debated.
