Handbook on the Economic Complexity of Technological Change (Elgar Original Reference) Cristiano Antonelli

'The editor of this Handbook, Cristiano Antonelli, is to be commended for the high quality of the group of authors he has assembled for this project. They provide excellent coverage of the various areas within the field, covering complexity of innovation, complexity of knowledge, complexity of structural change and development, and lessons and implications for economic policy. This is an important and evolving topic, and this book captures the cutting edge of research on it, particularly in connection with the broader idea of economic complexity.'

- J. Barkley Rosser, Jr, James Madison University, US

This comprehensive and innovative *Handbook* applies the tools of the economics of complexity to analyse the causes and effects of technological and structural change. It grafts the intuitions of the economics of complexity into the tradition of analysis based upon the Schumpeterian and Marshallian legacies.

The *Handbook* elaborates the notion of innovation as an emerging property of the organized complexity of an economic system, and provides the basic tools to understand the recursive dynamics between the emergence of innovation and the unfolding of organized complexity. In so doing, it highlights the role of organizational thinking in explaining the introduction of innovations and the dynamics of structural change.

With a new methodological approach to the economics of technological change, this wide-ranging volume will become the standard reference for postgraduates, academics and practitioners in the fields of evolutionary economics, complexity economics and the economics of innovation.

Contributors: C. Antonelli, H. Bloch, I.M. Bodas Freitas, A. Bonaccorsi, R. Boschma, U. Cantner, A. Colombelli, D. Consoli, K. Dopfer, G. Dutrénit, D. Ernst, J. Fagerberg, M. Fransman, K. Frenken, A.
