Ian P. Howard, Brian J. Rogers

Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series) Ian P. Howard, Brian J. Rogers

The three-volume work *Perceiving in Depth* is a sequel to *Binocular Vision* and *Stereopsis and to Seeing in Depth*, both by Ian P. Howard and Brian J. Rogers. This work is much broader in scope than the previous books and includes mechanisms of depth perception by all senses, including aural, electrosensory organs, and the somatosensory system. Volume 1 reviews sensory coding, psychophysical and analytic procedures, and basic visual mechanisms. Volume 2 reviews stereoscopic vision. Volume 3 reviews all mechanisms of depth perception other than stereoscopic vision. The three volumes are extensively illustrated and referenced and provide the most detailed review of all aspects of perceiving the three-dimensional world.

Volume 2 addresses stereoscopic vision in cats and primates, including humans. It begins with an account of the physiology of stereoscopic mechanisms. It then deals with binocular rivalry, binocular summation, binocular masking, and the interocular transfer of visual effects, such as the motion aftereffect and visual learning. The geometry of the region in binocular space that creates fused images (the horopter) is discussed in some detail. Objects outside the horopter produce images with binocular disparities that are used for stereoscopic vision. Two chapters provide accounts of mechanisms that bring the images into binocular register and of stimulus tokens that are used to detect binocular disparities. Another chapter discusses cyclopean effects, such as cyclopean illusions, cyclopean motion, and binocular direction that are seen only with binocular vision. Stereoacuity is the smallest depth interval that can be detected. Methods of measuring stereoacuity and factors that influence it are discussed. Two chapters deal with the various types of binocular disparity and the role of each type in stereoscopic vision. Another chapter deals with visual effects, such as figure perception, motion perception, and whiteness perception that are affected by the relative distances of stimuli. The spatiotemporal aspects of stereoscopic vision, including the Pulfrich stereomotion effect are reviewed. The volume ends with an account of techniques used to create stereoscopic displays and of the applications of stereoscopy.

From reader reviews:

Earline Martin:

Hey guys, do you desire to find a new book to see? Maybe the book with the name Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series) suitable to you? Typically the book was written by well-known writer in this era. The particular book entitled Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series) is one of several books that everyone reads now. This particular book has inspired a lot of people in the world. When you read this e-book you will enter the new dimensions that you have never known before. The author explained their concept in a simple way, so all of us can easily understand the core of this book. This book will give you a lot of information about this world now. To help you to see the representation of the world within this book.

Laverne Jackson:

The guide entitled Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series) is the book that I recommend you to study. You can see the quality of the guide content that will be shown to you. The language that the creator uses to explain their ideas is easy to understand. The copywriter did a lot of research when writing the book, therefore the information that they share for you is absolutely accurate. You also could possibly get the e-book of Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series) from the publisher to make you a lot more enjoy free time.

Robert Bryant:

Don't be worried in case you are afraid that this book will certainly fill the space in your house, you can have it in e-book form, more simple and reachable. That Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series) can give you a lot of friends because by you considering this one book you have matter that they don't and make anyone more like an interesting person. That book can be one of the steps for you to get success. This guide offers you information that maybe your friend doesn't understand, by knowing more than some others make you to be great men and women. So, why hesitate? We need to have Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series).

Floyd Brown:

Reserve is one of the sources of knowledge. We can add our information from it. Not only for students but native or citizen will need books to know the updated information of year to year. As we know those e-books have many advantages. Besides all of us add our knowledge, they may also bring us to around the world. From the book Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series) we can have more advantage. Don't that you be creative people? To get creative person must prefer to read a book. Simply choose the best book that is suitable with your aim. Don't end up being doubtful to change your life at this book Perceiving in Depth, Volume 2: Stereoscopic Vision (Oxford Psychology Series). You can more enjoy than now.
