Statistical Signal Processing for Neuroscience and Neurotechnology

Statistical Signal Processing for Neuroscience and Neurotechnology

This is a uniquely comprehensive reference that summarizes the state of the art of signal processing theory and techniques for solving emerging problems in neuroscience, and which clearly presents new theory, algorithms, software and hardware tools that are specifically tailored to the nature of the neurobiological environment. It gives a broad overview of the basic principles, theories and methods in statistical signal processing for basic and applied neuroscience problems.

Written by experts in the field, the book is an ideal reference for researchers working in the field of neural engineering, neural interface, computational neuroscience, neuroinformatics, neuropsychology and neural physiology. By giving a broad overview of the basic principles, theories and methods, it is also an ideal introduction to statistical signal processing in neuroscience.

- A comprehensive overview of the specific problems in neuroscience that require application of existing and development of new theory, techniques, and technology by the signal processing community
- Contains state-of-the-art signal processing, information theory, and machine learning algorithms and techniques for neuroscience research
- Presents quantitative and information-driven science that has been, or can be, applied to basic and translational neuroscience problems

From reader reviews:

Nicole Oneal:

This book untitled Statistical Signal Processing for Neuroscience and Neurotechnology to be one of several books which best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit on it. You will easily to buy this specific book in the book shop or you can order it by means of online. The publisher of the book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Mobile phone. So there is no reason for you to past this reserve from your list.

Paulette Cantu:

Reading a book for being new life style in this year; every people loves to learn a book. When you examine a book you can get a lots of benefit. When you read publications, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, and also soon. The Statistical Signal Processing for Neuroscience and Neurotechnology provide you with a new experience in reading through a book.

Gary McKinney:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that examining is not important, boring and can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Statistical Signal Processing for Neuroscience and Neurotechnology can make you really feel more interested to read.

Charles Kinsella:

Reserve is one of source of knowledge. We can add our know-how from it. Not only for students but additionally native or citizen will need book to know the update information of year to be able to year. As we know those guides have many advantages. Beside all of us add our knowledge, can bring us to around the world. By the book Statistical Signal Processing for Neuroscience and Neurotechnology we can consider more advantage. Don't you to definitely be creative people? To become creative person must prefer to read a book. Just choose the best book that suitable with your aim. Don't be doubt to change your life with this book Statistical Signal Processing for Neuroscience and Neurotechnology. You can more appealing than now.
