Stuck in the Shallow End: Education, Race, and Computing Jane Margolis

The number of African Americans and Latino/as receiving undergraduate and advanced degrees in computer science is disproportionately low, according to recent surveys. And relatively few African American and Latino/a high school students receive the kind of institutional encouragement, educational opportunities, and preparation needed for them to choose computer science as a field of study and profession. In *Stuck in the Shallow End*, Jane Margolis looks at the daily experiences of students and teachers in three Los Angeles public high schools: an overcrowded urban high school, a math and science magnet school, and a well-funded school in an affluent neighborhood. She finds an insidious "virtual segregation" that maintains inequality. Two of the three schools studied offer only low-level, how-to (keyboarding, cutting and pasting) introductory computing classes. The third and wealthiest school offers advanced courses, but very few students of color enroll in them. The race gap in computer science, Margolis finds, is one example of the way students of color are denied a wide range of occupational and educational futures. Margolis traces the interplay of school structures (such factors as course offerings and student-to-counselor ratios) and belief systems -- including teachers' assumptions about their students and students' assumptions about themselves. *Stuck in the Shallow End* is a story of how inequality is reproduced in America -- and how students and teachers, given the necessary tools, can change the system.

From reader reviews:

Gerald Stewart:

People live in this new time of lifestyle always try and and must have the free time or they will get great deal of stress from both way of life and work. So , once we ask do people have extra time, we will say absolutely without a doubt. People is human not only a robot. Then we request again, what kind of activity have you got when the spare time coming to anyone of course your answer will certainly unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, the actual book you have read is usually Stuck in the Shallow End: Education, Race, and Computing.

Pamela Edmonds:

Playing with family in the park, coming to see the sea world or hanging out with pals is thing that usually you will have done when you have spare time, in that case why you don't try matter that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Stuck in the Shallow End: Education, Race, and Computing, you could enjoy both. It is good combination right, you still want to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't have it, oh come on its named reading friends.

Shelia Lopez:

You are able to spend your free time to see this book this guide. This Stuck in the Shallow End: Education, Race, and Computing is simple to develop you can read it in the park, in the beach, train in addition to soon. If you did not have got much space to bring the actual printed book, you can buy typically the e-book. It is make you simpler to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Joseph Langley:

What is your hobby? Have you heard that question when you got scholars? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. So you know that little person like reading or as examining become their hobby. You need to understand that reading is very important and book as to be the matter. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You get good news or update regarding something by book. Numerous books that can you decide to try be your object. One of them is this Stuck in the Shallow End: Education, Race, and Computing.
