Taxation: Law, Planning, and Policy Michael A. Livingston, David S. Gamage

This publication differs from most existing tax casebooks the following ways:

The book emphasizes current concerns in tax law and policy, issues and problems that are likely to confront the next generation of tax practitioners and policy-makers. Thus, substantial space is devoted to the new breed of tax shelters; the tax treatment of gay and unmarried couples; and the relationship of taxes to health, retirement, and environmental policy, without sacrificing the "classic" cases that are the backbone of any tax book.

The text consists of twelve chapters, each containing all of the types of problems described above and concluding with an in-depth, take-home problem that may be used either as the basis for in-class discussion or as a graded written assignment.
