## **Challenging Social Inequality: The Landless Rural Workers Movement and Agrarian Reform in Brazil**

In *Challenging Social Inequality*, an international and interdisciplinary group of scholars and development workers explores the causes, consequences, and contemporary reactions to Brazil's sharply unequal agrarian structure. They focus on the Landless Rural Workers Movement (MST)—Latin America's largest and most prominent social movement—and its ongoing efforts to confront historic patterns of inequality in the Brazilian countryside. Several essays provide essential historical background for understanding the MST. They examine Brazil's agrarian structure, state policies, and the formation of rural civil-society organizations. Other essays build on a frequently made distinction between the struggle for land and the struggle on the land. The first refers to the mobilization undertaken by landless peasants to demand government land redistribution. The struggle on the land takes place after the establishment of an official agricultural settlement. The main efforts during this phase are geared toward developing productive and meaningful rural communities. The last essays in the collection are wide-ranging analyses of the MST, which delve into the movement's relations with recent governments and its impact on other Brazilian social movements. In the conclusion, Miguel Carter appraises the future of agrarian reform in Brazil.
