Target tracking has tremendous applications in both military and civilian surveillance systems. Typical applications are satellite surveillance systems, air-traffic control, undersea surveillance, sophisticated weapon delivery systems, global positioning systems, etc. The rapid developments in hardware and software technology have increased the signal processing capabilities of these surveillance systems. Advances in sensing resources have made possible to collect the enormous and complex amount of observation data from the targets. This has generated a continuing need for further development in information processing capabilities of these systems. Besides that, target tracking is as such a very complex problem. Complexity of the overall tracking problem increases substantially with the presence of maneuvering target, multiple targets, multiple distributed sensors, and background noise or clutter. In this book we develop a set of new suboptimal filtering and smoothing algorithms for maneuvering target tracking application. The proposed algorithms provide better performance in terms of estimation accuracy over the existing algorithms.

From reader reviews:

Alan Castorena:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to be aware of everything in the world. Each e-book has different aim as well as goal; it means that publication has different type. Some people truly feel enjoy to spend their time and energy to read a book. They may be reading whatever they take because their hobby is reading a book. Consider the person who don't like examining a book? Sometime, man or woman feel need book once they found difficult problem or exercise. Well, probably you should have this ADVANCED ALGORITHMS FOR MULTI-SENSOR MULTI-TARGET TRACKING: Estimation and Tracking for Stochastic Hybrid Systems.

Frank Cockerham:

This book untitled ADVANCED ALGORITHMS FOR MULTI-SENSOR MULTI-TARGET TRACKING: Estimation and Tracking for Stochastic Hybrid Systems to be one of several books this best seller in this year, this is because when you read this guide you can get a lot of benefit on it. You will easily to buy this specific book in the book retail outlet or you can order it by means of online. The publisher with this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason to you personally to past this reserve from your list.

Cynthia Caron:

Is it anyone who having spare time in that case spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This ADVANCED ALGORITHMS FOR MULTI-SENSOR MULTI-TARGET TRACKING: Estimation and Tracking for Stochastic Hybrid Systems can be the solution, oh how comes? A book you know. You are so out of date, spending your time by reading in this new era is common not a nerd activity. So what these ebooks have than the others?

Jacqueline Thompson:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from the book. Book is prepared or printed or illustrated from each source which filled update of news. In this particular modern era like currently, many ways to get information are available for you. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just searching for the ADVANCED ALGORITHMS FOR MULTI-SENSOR MULTI-TARGET TRACKING: Estimation and Tracking for Stochastic Hybrid Systems when you necessary it?
